Professional Summary

Web developer, finished my studies at John Bryce as a full-stack developer and looking to apply my knowledge at building and designing user interfaces, testing and debugging.
Strong ability in optimizing web functionalities that improve data retrieval and workflow efficiency.
Currently a computer science student at the Open university of Israel.

Github Projects

Web grocery store

https://github.com/HeroicMuffin/Angular-Shopping-Store
Locally developed, online store simulation.
Developed with Angular, NodeJs and MongoDb via mongoose.

Store includes user registeration and validation, data retrieval from the
database and simulating an online store and cart filling mechanism.
Includes admin privileges and special actions

Vacation data interface

https://github.com/HeroicMuffin/JB-Vacation-Project
Locally developed with React, Redux, NodeJs, MySQL and design libraries such as Bootstrap and Material UI,
Later hosted on AWS.
Landing page portraying vacation database with prices, images, description of the destination, statistics graphs
and more features.
Includes user registration and validation, admin access and special privileges
such as editing existing vacation or removing from the database.
